Skills

Programming & Development

- Python, Java, C++, Swift, SQL, PHP, HTML/CSS, JavaScript
- Object-Oriented Programming (OOP), Data Structures & Algorithms
- Test-Driven Development, Debugging, Unit & Integration Testing

AI & Machine Learning

- Large Language Models (LLMs), AI Guardrails, AI Monitoring Systems
- Retrieval-Augmented Generation (RAG), Prompt Engineering (DSPy)
- Hugging Face, OpenAI APIs, Vector Databases (Milvus)
- LLMs | RAG Pipeline | Model Evaluation | Prompt Optimization | Vector Search | OpenAI API |

Cloud & DevOps

- Google Cloud Platform (GCP), Docker, Splunk (HEC pipelines & dashboards)
- n8n Workflow Automation, Virtual Machines, Firewall Configuration
- Secure CI/CD Workflows, System Observability & Monitoring

Systems & Configuration Management

- Product Lifecycle Management (PLM), Configuration Control
- Model-Based Systems Engineering (MBSE)
- System Validation, UAT Planning, Technical Documentation

Databases & Storage

- MySQL, Vector Databases, Data Pipeline Design
- SQL Joins, Data Modeling, Secure Data Integration

UI/UX & Design Tools

- SwiftUI (Apple Watch), Xcode, Figma, Lucidchart
- User Requirements Gathering, Interface Design, Wireframing

Collaboration & Project Management

- Jira (Agile Scrum), GitHub, SharePoint, Google Workspace
- Cross-Functional Team Collaboration, Peer Code Reviews
- Training & Curriculum Development, Mentorship

Operating Systems

- Linux, Windows, macOS

Summary

Software Engineer with hands-on experience in AI system security, observability, and scalable software development. Skilled in Python, C++, SQL, and modern frameworks, with proven success in building AI monitoring dashboards, guardrails for LLMs, and cloud-based secure pipelines. Experienced in Agile Scrum, technical documentation, and mentoring, with a strong record of improving system performance, reducing downtime, and accelerating project delivery.

EXPERIENCE

NIIT Managed Training Services
Renton, WA
Site Support Specialist at Boeing September 2024 – present

- Coordinate 15+ daily training programs by providing **document access, and technical support**, enabling 150+ staff to complete training with a 10% productivity increase.
- Collaborate with cross functional team through weekly meetings on Microsoft team to define and prioritize business needs, **improving project delivery efficiency by 25%.**

Gekko Corporation – Bellevue, WA
Software Engineer Intern (AI/LLM) — Jan – Jul 2025

- Applied prompt engineering techniques with LangChain & DSPy, achieving 20% improvement in LLM response relevance for customer-facing AI automation.
- Built a Gradio-powered UI for internal AI testing using Hugging Face & Python, boosting verification test coverage by 30%.
- Contributed to the architecture of secure AI agents by implementing Python-based Guardium logic, enhancing reliability and safety AI workflows.
- Collaborated with cross-functional engineering teams via Jira to break down project workflow and progress update throughout sprint cycle, achieved on time project delivery.
- Conducted business requirements analysis and executed **User Acceptance Testing (UAT)**, reducing post-release defects by 25% and improving system reliability.

Project Link: https://uwb-stem.github.io/Spring-2024/csse-abstract-page.html?csse-2-315

Gekko Corporation – Bellevue, WA
Splunk System Administrator Intern — Jan – Dec 2024

- Configured secure TCP/IP pipelines on Splunk for 100+ data sources, ensuring high system integrity.
- Developed 20+ operational dashboards & alerts in Splunk, reducing issue response time by 25%.
- Automated 80+ AI security metrics in Python, enabling early anomaly detection and increasing coverage by 40%.
- Delivered technical presentations on AI security metric implementations, accelerating team adoption and reducing project delivery timelines by 2 weeks.

Code with Kids
Bellevue, WA
Coding Instructor — Nov 2023 – Present

- Mentor students to build games and AI projects across multiple programming languages, achieving **85% student pass rate to the next level**.
- Communicate complex technical concepts clearly troubleshoot students' code in real time, enhancing technical communication and mentoring skills.
- Engaged with customers through demo sessions, progress reports, and hosted hackathon events to foster a fun learning environment.

PERSONAL PROJECT

Chatbot AI Agent
July 2025

- Designed and built a Retrieval-Augmented Generation (RAG) pipeline using Chroma and OpenAI embeddings to support document aware chatbot agents, enabling accurate context retrieval.
- **Automated data retrieval workflows** with LangChain and OpenAI Chat models, achieving 95% data availability while reducing operational costs by 40%.
- Benchmarked LLM response quality across document types by refining prompt templates, improving prompt performance and response latency by 25%.

CERTIFICATIONS

- **Microsoft Certified: Azure AI Fundamentals** – Machine learning fundamentals, computer vision, NLP, conversational AI, AI deployment on Azure.

Microsoft Certificate Link: https://learn.microsoft.com/api/credentials/share/en-us/kenny208-8919/1F976DFB668F57E3?sharingId

- **IBM TechXchange Dev Day – Virtual Agents** – AI agent development, conversational design, IBM watsonx integration, open-source AI frameworks.

  IBM TechXchange Dev Day – Virtual Agents Certificate Link: https://www.virtualbadge.io/certificate-validator?credential=0f9448aa-224d-48d7-a324-066061602845

Chatbot Email Summarizer | Python, n8n, OpenAI API | 2024

- Built an autonomous chatbot to summarize emails, improving inbox management efficiency by 50%.

VOLUNTEER

Medhane-Alem Evangelical Church – Bellevue, WA

Media Team Leader (Volunteer) | Mar – Jun 2024

- Led a volunteer team to stream live weekly services, reaching 500+ remote viewers.
- Designed broadcast-quality video and graphics, boosting engagement.

Academic Projects

MySQL-PHP Database Application | PHP, MySQL, SQL | Mar – Jun 2024

- Designed a secure PHP-MySQL system handling 1,000+ queries/hour.
- Implemented SQL joins and filters for efficient data retrieval, improving usability by 30%.

Bank System | C++, OOP, Docker, Linux | Jan – Mar 2024

- Built a scalable bank transaction system with OOP principles, ensuring 100% accuracy.
- Optimized algorithm from $O(n^2)$ to $O(\log n)$, reducing latency by 30%.

Inventory Management System | C++, OOP, Docker | Mar – Jun 2024

- Developed system with extensibility and reliability, improving data retrieval speed by 80%.
- Created system architecture diagrams in Lucidchart for documentation and team workflow.

Apple Watch Health Tracker | SwiftUI, Figma, Xcode | Mar – Jun 2024

- Designed a user-friendly Apple Watch interface, improving usability by 60%.
- Conducted UAT sessions, achieving 90% satisfaction with user requirements.
